

FAYETTE COUNTY

**PHEASANTS
FOREVER®**

Pheasants Forever's mission is to conserve pheasants, quail, and other wildlife through habitat improvements, public access, education, and conservation advocacy.

Nesting Cover

Nesting cover is the single most important limiting factor for pheasant populations and is also important for our upland birds!

Food Plots

When done correctly, food plots provide a critical link between food, cover and movement for pheasants.

Native Grasses

We have planted thousands of acres of native grasses on hundreds of projects!

Woody Cover

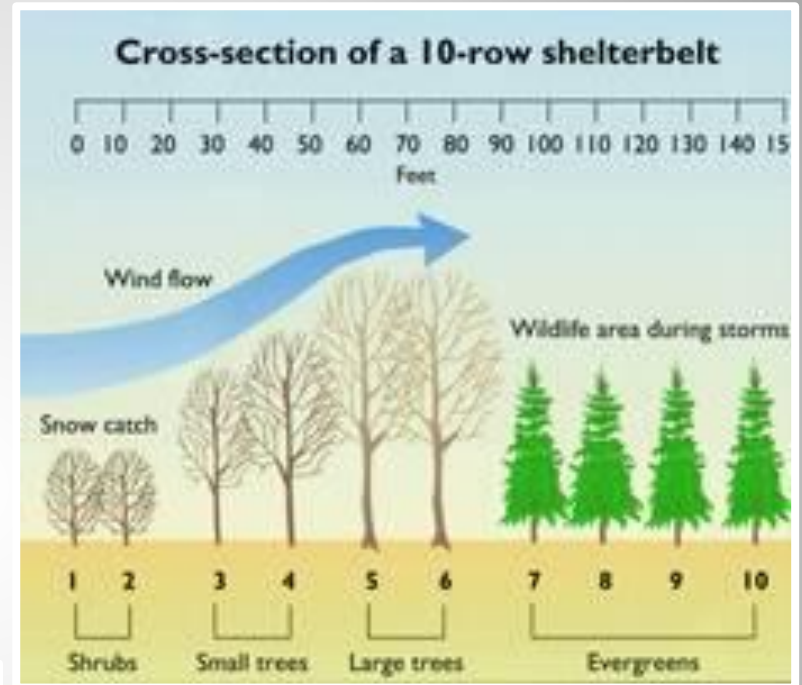

We have
planted over
500,000 trees
and shrubs.

Riparian Plantings

Woody Cover

Shelterbelts and Windbreaks

Shooting Sports

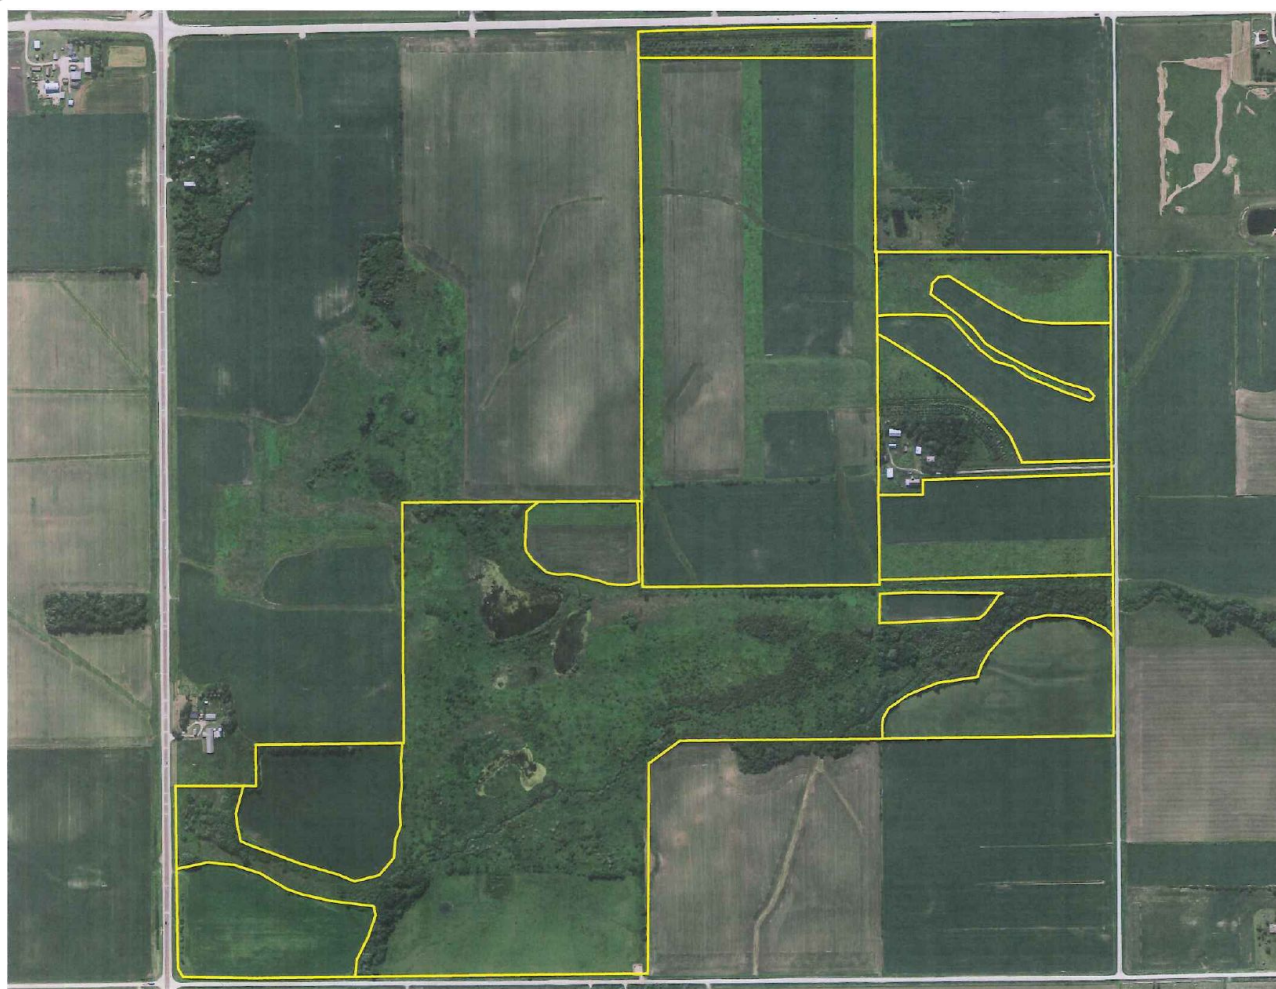

Hunters Safety
